The Angekis Technology Saber IP20X camera has been installed to improve hybrid learning at Utrecht University, allowing students at home to participate in lessons via MS Teams. This makes learning and teaching more accessible for those in the classroom and all over the world. With 20x zoom, the presenter can focus in on the tiniest details - important when you're learning high level mathematics.

Using Angekis Technology Saber IP20X cameras, as well as the wide angle lens of the Saber Light, these musicians set up an incredible production. With our cameras and our partner vMix's software, they were able to rapidly switch between views of each band member, each instrument, and the whole group - as well as point, tilt, zoom and refocus each camera in real time.
